## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 27-37, 45-47 and 52-55, drawn to a method of assaying substances.

Group II, claim(s) 38-42, 44, 48, and 51, drawn to a cuvette or microtiter plate and kit.

Group III, claim(s) 43, 49, and 50, drawn to a solution containing a compound containing a fluorophore.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature linking the groups is the microplate and kit with the microplate in Group II. However, US Patent 4,444,879 to Foster et al discloses a microtiter plate with binding reagents in the wells, a kit with the microtiter plate, and solutions of fluorescently

labeled antibodies. Therefore, there is no special technical feature linking Groups I-III to form a single inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
